

## INTRODUCTION

### MISSION

My mission statement is to deliver an outstanding project to my clients that will help them represent themselves in a constructive, artistic, and thought-provoking manner.

### VISION

My vision for the future is to provide excellent design solutions to the business community in the country and abroad, allowing the company and my clients to expand together.

## MY LOGO

I followed a modern style, geometric and smooth shape that represents my name in Arabic. Designing a bilingual logo adds value not only by showing a bit more about my origin and background, but also by attracting and catching the viewer's eye for having something new.

## PATTERN
